

# RONIN®

Datasheet  
Motores Trifásicos y Monofásicos

CORESA®

Modelo

RM-T2-4F-12500-280-36

Trifásico  
Hierro

1500RPM  
4P

HP  
**125,00**

|              |         |                       |
|--------------|---------|-----------------------|
| Info General | Skü     | RM-T2-4F-12500-280-36 |
|              | EAN13   | 7428325601093         |
|              | Tipo    | Trifásico             |
|              | Carcaza | 280M                  |
|              | Polos   | 4                     |

|                |                                  |           |
|----------------|----------------------------------|-----------|
| Info Eléctrica | RPM                              | 1500      |
|                | Eficiencia (S)                   | 2         |
|                | Tensión (V)                      | 380/660V  |
|                | Hz                               | 50Hz      |
|                | Factor de potencia (cos $\phi$ ) | 0,88      |
|                | Potencia HP                      | 125,00    |
|                | Potencia kW                      | 90,00     |
|                | EFF $\eta$ = (%)                 | 94,2      |
|                | Corriente (A)                    | 165/95    |
|                | dB(A)                            | 80        |
|                | Capacitor ( $\mu$ F) monofasicos | No Aplica |
|                | Aislamiento ISOL                 | No Aplica |

|             |                  |              |
|-------------|------------------|--------------|
| Info Física | Dimensiones [mm] | 1150*650*850 |
|             | Peso [kg]        | -            |
|             | Material         | Hierro       |

|           |                      |              |
